

Clark Forklift

Clark Forklift Forklift Training - At present, there are at least 350,000 Clark forklifts performing globally, and more than 250,000 operating in North America alone. With five major lines across the globe, Clark is proud to be one of the most expansive organizations in the industry. Heavy duty vehicles ranging from 1,500lb to 18,000lb capacities, dual fuel, gas, LPG, hand powered lift trucks, narrow-aisle stackers and electric riders are some of their specialties.

Clark Totalift, covers more than 120,000 specialized items intended for 20 distinctive designs of forklifts and automated equipment. Your local Clark Supplier is your total source for availability of all your components requirements provided by Clark Totalift.

Clark features a exceptional Parts Distribution team. The parts warehouses are conveniently positioned in Changwon, South Korea and Louisville, Kentucky to make certain exceptional service to both their customers and their sellers. For over 90 years, Clark has surpassed industry standards, being one of the most actively advancing manufacturers. Driven to supply the highest level of value and service to our customers, Clark remains on the leading edge when it comes to improving output and benefiting performance.

Clark Totalift has a really amazing intercontinental support network. With over 550 locations worldwide, seller representation in over 80 countries and 230 locations in North America, their high level of dedication to their consumers predominates the material handling market.

Clark proudly remains an innovative leader of the industrial equipment industry, pioneering protection features such as the operator restraint system. This exceptional dedication to safety is now a customary feature on every lift truck.

Clark's relentless goal to possess the No. 1 Quality system in the industry is proudly demonstrated by ISO 9001 - Clark, is the first lift truck producer across the world to be certified with the globally accepted quality standard ISO 9001 for each and every one of their production plants. Additionally, the ISO 14001 Environmental Stewardship System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement allows Clark to be ready for any number of environmental limitations, thus placing them in a prevailing market position.

Resource Efficient Production

Clark has chosen the structure of "Lean Production" at all of its assembly facilities because this system is extremely economical and allows for minimal use of resources. Established to guarantee maximum proficiency, this system is designed to find and acknowledge the most effective ways for manufacturing plant management. Clark has concluded this transition of its Korean plant. COPS which is Clark Optimized Production System, equally focuses on quality of product and services and manufacturing efficiencies.

Engineering

Clark's product engineers and suppliers join together to develop the proficiency and brilliance of their merchandise while minimizing expenses. The contemporary value engineering agenda combines modern product growth and offers superior client support and service within the industry.
