London Forklift Training Courses

London Forklift Training Courses - When forklift operator safety training is tailored for illiteracy, training time is reduced by 50%. Lift-truck operator driver safety training evaluation, train the trainer and forklift training certification programs offer thorough, regulation-compliant training in industrial-powered fork truck use and safety. Lift truck pedestrian safety is offered too.

We have a highly skilled group of professional trainers to make sure that your staff are well-trained. The certification is delivered on site by one of our licensed instructors. Those training would learn how to spot possible dangers and perform safety inspections necessary for the safe and efficient utilization of a powered industrial lift truck.

Forklift Training Tips
It is important that all workplaces utilizing forklifts have the following checklist or one equivalent on the premises. If all of the safety rules are being followed, each of these questions should be answered with a "yes". A "no" to whatever question indicates a procedural weakness that might result in accident, injury or damage to equipment.

1) Is the operating area of the forklift separate from the traffic of pedestrians?
2) Is access to forklift areas by pedestrians restricted by a barrier?
3) Are pedestrian walkways well marked and provided?
4) A sign is clearly visible stating a "lift truck in operation"?
5) There are mirrors provided at blind spots for pedestrians and operators?
6) Are changes to daily lift truck schedules communicated to all affected employees?
7) The forklift tires being utilized are suitable for all operating surfaces?
8) Forklift seatbelt is being used?
9) The seat of the forklift is in good condition?
10) Is a regular forklift maintenance schedule followed?
11) Are annual inspections of the forklift being carried out?
12) Is the type of forklift right for the tasks?
13) Does forklift has a readable load chart?
14) Do all operators know how to read the load chart?
15) The chart lists the safe lifting capacity for all attachments and their uses?
16) Do the forklift warning devices work properly?
17) The speed operating control device is secured right?
18) The forklift overhead cage is fitted right?
19) Have all forklift operators acquired certification?
20) Warning signs and speed limits are being observed?
21) The operators have current training for the lift trucks being utilized?
22) Do operators know their duties to report any machine damage and forklift accidents?
23) Prior to the equipment being operated, the pre-test checklist is being reviewed each and every day?
