## London Manlift Ticket

London Manlift Ticket - The Elevated Platforms and Manlifts Certification program helps to provide the necessary training on the safe operating procedures, work practice, rules and regulations regarding the daily activities for the operators of this equipment. The program has been designed for people who are actively involved in these activities or those who have a basic knowledge of this machinery.

manlifts and aerial platforms have become common and integral machinery in industrial settings during the past few decades. These equipment provide an easy way to lift workers near what must be performed on a stable platform apparatus, enabling employees to carry out tasks with greater comfort and safety rather than being perched on top of ladders or scaffoldings.

Like every other device, manlifts are just safe if they are utilized properly. Since they elevate workers above ground level or floor, accidents can easily take place and this could cause serious fatalities or injuries for both the manlift operators and whoever passerby who may be unlucky enough to be standing underneath.

There are different kinds of manlifts. The majority fall into 1 of 2 categories: the articulating boom lift, that has the capability of both vertical and horizontal movement and the scissors lift, which is capable of moving up and down.
