London Crane Training Schools

London Crane Training Schools - We have designed several programs for Mobile Crane Operation at our Crane Training Schools. These programs are recommended for the experienced operator who requires certification or re-certification, and for inexperienced operator who is seeking work in the industry. Positions for crane operators are in demand due to their high pay. Operators of cranes are amongst the highest paid of any heavy machine operator.

Our Crane Training Schools feature instruction and training for a wide variety of mobile cranes. Course content consists of Wire Rope, Crane Set-up, Load Dynamics, Lift Planning, Rigging, Signaling and Load Charts.

The program is best for crane riggers, operators as well as their supervisors. The materials incorporated in the course will include a manual and a lot of informative handouts. The illustrated safety instruction manual consists of 100 to 250 pages, that depends on the course, of helpful and important material. Course materials comprise load exercises and load charts for the crane with which the trainee is working.

Hands-On Safety Training would take up over half of the course curriculum. The practical training part is the most helpful method to improving and developing personal skill levels. Just experienced journeyman crane instructors are chosen to teach the courses. Our instructors possess numerous years of business experience.

For all the course we offer, we could include optional testing mechanisms to customize your training. A skills test is normally administered for programs that include H.O.S.T. People training will be tested and graded.

We provide certified training programs for the following cranes: Fixed and Swing Cab Mobile Hydraulic Cranes; Lattice Boom/Crawler Cranes; Rigging / Signalperson Training and Certification; Articulated Boom / Knuckleboom Cranes; In-The Seat Training and Testing & Certification.

Industry standards of practice are changing as new trade requirements surface. There are continual updates to regulations and legislation. Enhancements in technology and equipment continue to be made. Industry data analysis and collection identify trends which are changing. Members maintain the advantage of managing their certifications and training programs. Mobile device alerts keep members abreast of personal and workplace safety news.
