London Manlift Operator Certification

London Manlift Operator Certification - We provide an aerial lift and scissor platform certification and training to empower the one training with the knowledge and general understanding of the safe and efficient use of "Power Operated Mobile Work Platforms," in accordance to the current regulations within the industry. Upon successful completion of training, the participants will be able to understand and know certain safety and health related hazards associated with operating aerial and scissor lifts.

There are a variety of affiliated places in your district providing Manlift Operator Certification Programs. Those training are provided with in-depth instruction about safe operation and regulations along with extensive hands-on training. The level of skill and knowledge of each trainee is evaluated and people who are capable of demonstrating an acceptable level of operational competence would be given Operator Certification cards and employee documentation.

Theory Training
The trainer guides those training through a comprehensive and interactive review throughout the theory training. The operator course book is studied that covers all applicable rules. Other subject matters like various machine kinds in addition to various sizes and associated applications, safe operating procedures, pre-use checks and general work place safety are explored individually.

Theory Evaluation
The evaluation of the theory parts begins with a written test, that focuses on the course concepts which was covered in the reference instruction manual. Tests are graded and returned to the trainee. The tests are then reviewed to guarantee understanding and a minimum score of 70% is required in order to pass this part of the training.

Practical Training
The hands-on part of the program is covered in the practical training. Here, trainees are shown the safe operating procedures, the parking and shutdown procedures and the pre-use check procedures. Each and every trainee has the chance to operate the machine and practice the skills they learned in Theory Training under the course trainer's helpful eye in a setting that is safety controlled.

Practical Evaluation
The Practical Evaluation is where the ones training are assessed to assure they have reached a minimum level of skill. The trainees are then assessed on an individual basis utilizing the equipment in a reasonably difficult course setting. Once the evaluation is complete, the trainees are de-briefed and given the chance to deal with any issues they may have about any portion of the program. Each successful trainee's employer would be given the official records and documents shortly after the program has been finished.
