

London Aerial Lift Train the Trainer

London Aerial Lift Train the Trainer - The Aerial Lifts Train the Trainer Certification Program will teach trainers how to effectively train operators in safe industrial mobile machinery operation. Trainers are provided with in-depth instruction about aerial lift machinery. The program is offered on an open enrollment basis and delivered at select training locations. Prior to certification, trainers are assessed and scored based on their understanding and demonstrated skills.

The Aerial Lifts Train the Trainer Certification Program focuses on practical learning and as the best training provider in the business, we offer top notch hands-on training. We give lots of opportunities to practice the techniques and concepts that are taught inside the classroom. Along with hands-on experience, trainers develop general understanding of equipment theory and instructional techniques, classroom and field communication skills, and ability to effectively train and evaluate operators. Trainers would gain knowledge of what traits make an effective trainer.

The Aerial Lifts Train the Trainer Program likewise teaches the right methods required to express the correct information within the classroom and field setting. There are three factors of machine operation which the trainer should learn how to convey to operators: what to carry out; how to do it; and why it should be done.

The program provides up-to-date, detailed reference material to be able to help trainers convey the subject matter to equipment operators. Instruction manuals contain detailed information on all aspects of industrial mobile machine operator training. Incorporated within the package are training aids that provide a visual reference to improve the learning experience. The equipment-specific training products contain necessary materials intended for both the trainer and the operator: videos/DVD's, overhead transparencies, safety message posters, kinds of equipment; stability pyramids and digital training aids.
